Research experience

Behavioral Neuroendocrinology Lab

Mentor: Christopher A Lowry (CUB)

July 2020 – Present

- Led microbiome analysis for multiple projects within the lab and collaborations with other labs.
- Taught microbiome analysis techniques (via QIIME2) and statistics to other lab members and collaborators.
- Wrote review chapter of “The influence of microbiota on brain structure and functioning affecting neuropsychiatric outcomes” to be published by Springer.
- Analyzed untargeted metabolomics data for various *Mycobacterium vaccae* strains and plasma of animals treated with the strains.

Nutritional Biochemistry Lab

Mentor: William A Clark (ETSU)

August 2017 – May 2020

- Collaborated with research faculty at ETSU, Quillen College of Medicine, and Bill Gatton College of Pharmacy for research regarding the gut-brain axis, metabolic syndrome, vitamin levels, and supplement bioavailability.
- Instructed undergraduate experimental foods classes in performing proximate analysis on experimental foods.
- Designed and implemented a study to analyze the properties of the ETEE brand beeswax wrap.

Zahner Electrophysiology Lab

Mentor: Matthew Zahner (ETSU)

April 2018 – May 2018

- Assisted in rat autopsy and surgery in preparation for locating blood pressure regulatory centers of the brain and sympathetic denervation of the spleen in sepsis
